

The Importance of Praying to the CREATOR every day and night

If a non-BAITIANGONG person consumed food that has been used as an offering, would it affect them?

It is possible. Food that is offered to idols in worship could be contaminated by evil spirits as they could imprint their negative vibrations on the food. These evil spirits desire human to worship them. When we consumed this contaminated food, we could receive the consciousness that influences us to continue to worship the idol. Sometimes, the desire to continue to worship the idol could manifest itself in our dreams. In fact, the intention of these evil spirits are not to make human fall sick, but it is to influence human to worship them so that they could continue to absorb our life force energy.

If a BAITIANGONG follower consumed this worshipped food, what would be the impact?

It would not matter and nothing will happen because our body itself will know that we are praying to the CREATOR and will reject the influence of negative energy. However, if we know that the food was earlier used as offerings in worship, it would be best to recite the Prayer to pray to the CREATOR over the food before consuming it.

As we have been praying every day and night, this naturally creates an indirect protection for our body from any interference by evil spirits. However, if we do not pray to the CREATOR day and night, we could be subjected to interference by these evil spirits.

Why are some BAITIANGONG followers susceptible to influences of evil spirits or spells?

First and foremost, we have to ask ourselves whether we have pray to the CREATOR with our mind, body and soul.

How to deal with the idols affected by Spiritual Vampirism?

As a result of the daily worshipping of idols by human, the idols absorb and accumulate the life force energy released by human, via a process coined as Spiritual Vampirism by Xian Sheng. If for some reason, we want to stop worshipping these idols, can we just remove the idols? No! Not everyone can casually remove these idols.

Many years ago, the local newspaper reported an incident at Asia Jaya, Petaling Jaya where an Indian man was shouting hysterically as if he was possessed by some evil spirits. A Malay man believing himself to be a devout Muslim practitioner grab hold of the Indian man and started to recite some prayers. After a short while, the Indian man calmed down and regained control of himself. The Malay man became possessed instead as he began to shout hysterically.

Therefore, Xian Sheng tells us that we must pray until we fear nothing except the CREATOR and pray with our mind, body and soul. Even if the evil spirit is powerful, it cannot invade our body. For example, if our faith in BAITIANGONG exceeds 50% while the evil spirit's power is at 100%, it would still be unable to

invade our body as we practice fasting without food and water. However, if your faith in BAITIANGONG is less than 50%, then the evil spirit will have a chance to invade your body. Therefore your faith in BAITIANGONG must exceed 50%.

Regardless of whether a person prays to the CREATOR or not, everyone has an aura that protects them. However, we must understand that when we are scared or in fear, the vibration of the aura that protects us can be disrupted and cracks in our aura would allow evil spirits to seep in and take the opportunity to invade our body.

Most of the time, we may tell ourselves that we are not afraid or that we are a fearless person, but sometimes, when we are walking in a dark creepy place, our hearts will start to beat furiously with anxiety and we become overwhelmed by fear. Our aura will show signs of cracks in these instances. Having said that, we have to distinguish between shock due to sudden surprises and genuine fear. The shock we experience due to sudden surprises is not the kind of genuine fear that can cause our aura to crack. Genuine fear is caused by the anxiety of an impending danger or harm to ourselves, whether physically or psychologically. Walking alone in a dark creepy alley is more of a psychological effect of fear as we

fear the ghosts or evil spirits lurking there. It is therefore important that we pray until we fear nothing except the CREATOR.

The Divine Law of Nature can distinguish between fears that are physical in nature - from people who can cause us harm, and psychological in nature - from ghosts and evil spirits. In the context of psychology of fear, we must train ourselves to have courage so that we can overcome it. In the past, Xian Sheng would lead a group of followers to walk around the cemetery to train their psychological fears. If we are fearful of ghosts and evil spirits, the fear will grow stronger and stronger and our aura will crack easily allowing all types of weak and strong spirits to invade our body. Likewise, if we train our courage and overcome our psychological fear, the aura that naturally protects us will prevent any evil spirits from invading our body.

When a person is under the possession of spirits or in a trance, you should not be afraid. However, if you feel that you do not have enough faith to revive that person, then it would be better not to get involved, but just stand nearby and observe. Do not feel compelled to help the victim by going over, placing your hand on their forehead and start reciting the Prayer to pray to the CREATOR. You may seem composed on the surface, but your

heart could be beating frantically. However, if you believe that you are not fearful, then you must truly expel all your fear and go forward, recite the Prayer to pray to the CREATOR on the victim and they will be revived. What this simply means is that as long as you are not fearful, you have the ability to revive any person under the possession of evil spirits. Why? The reason is because you pray to the CREATOR, and the evil spirit that possesses the person knows that you pray to the CREATOR. Even when you silently recite the Prayer to pray to the CREATOR, they will know it too and will leave the victim.

When we perform the spiritual healing, the patient will absorb our life force energy. How do we restore the life force energy that we lost during the healing process?

Praying to the CREATOR every day and night will increase our life force energy or aura and also restore it. Before we attempt to provide spiritual healing, we should first pray to the CREATOR. After performing the spiritual healing, we should pray to the CREATOR again. This would ensure that our life force energy is fully restored after the healing.

Through the Divine Law of Nature, there is always an abundance of energy all around us within our surrounding. Before we start to perform the spiritual healing, we would kneel down to pray in order to seek positive energy to assist us to perform the spiritual healing process. We will also pray to the CREATOR for the speedy recovery of the patient. However, in certain circumstances, where the patient is beyond recovery, we would pray for the patient's peaceful demise. After the spiritual healing, we would once again kneel down to pray to thank the CREATOR. Our life force energy that was used to heal the patient will be restored as well as this is made possible through the Divine Law of Nature.

Take Home Values

Food that has been offered in worshipping idols may be tainted with negative life force energy and consuming this food could cause a person to be influenced to continue to worship the idols.

Your body itself will know that you are praying to the CREATOR and will reject the influence of negative life force energy.

We have been praying every day and night; this naturally creates an indirect protection for our body

Take Home Values

By praying to the CREATOR with our mind, body and soul, we will be protected against any evil spirits attempting to invade our body.

Every person has a protective aura that surrounds us. However, when we feel fearful, the vibration of the aura will be disrupted and cracks will form, that provides an opportunity for evil spirits to invade our body.

Kneeling down to pray to the CREATOR before and after healing will allow us to regain the life force energy transmitted when performing spiritual healing in accordance with the Divine Law of Nature.
